

The Lighthouse Reflector

February 9, 2024

"I will go before thee and make the crooked places straight."--Isaiah 45:2

Juniors Visit La Sierra University

This week our San Diego Academy juniors visited La Sierra University. Dania shared, "La Sierra has a great campus because it's in the outdoors, has sports, especially volleyball (which I love) and while we were there, I took a session of Physiology and Neuroscience. Physiology ties into pre med which is what I want to study in college. I also believe La Sierra is a good university because they transfer you to Loma Linda which is just down the street and very convenient." Alex shared, "I like the computer science room. You need an ID to get in and get to use the VR headsets." Bianca shared, "I really like the campus. The art building is very cool."

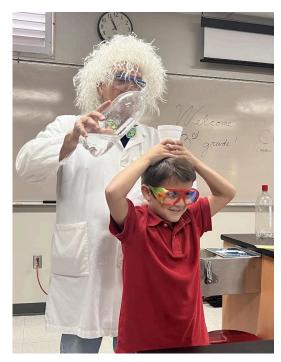

Elementary Activities

Third Grade Science Lab

story by David Roysdon, 7th grade teacher and photos by Nancy Verduzco, 3rd grade teacher

I had spoken to Mrs. Verduzco weeks ago about having her students participate in a lab with me. She agreed and we got together in the Science Lab on Wednesday to explore many simple facets of science. We talked about the difference in science between a Physical change and a Chemical change in materials and compounds with demonstrations. We also talked about Sir Isaac Newtons' Laws of Motion with explanations and demonstrations using Newtons' Cradle and ping pong balls. Next, we moved on to WATER, WATER EVERYWHERE and had student participation in some demonstrations. We followed this with FIRE and Dragons' Breath. Finally we wrapped things up with demonstrations and participation using the Bernoulli Principle. We made a ping pong ball fly and then made Toilet Paper fly through the air as the students eagerly gathered up the flying tissue. It was a fun group of students to work with and I must say, they have an incredible amount of ENERGY. Mr. Roysdon

Fifth Grade Trip to Living Coast story and photos by Heather Martinez, 5th Grade Teacher

The fifth grade class took a trip to The Living Coast in Chula Vista. The students began their day by doing a fish dissection, which most of them really enjoyed! We followed the dissection with some time looking at the various rescue animals they have there. After lunch, we took a nature hike and did some journaling. Overall it was a beautiful day and we were thankful for the time there and the beautiful weather.

High School Activities

Biology Pregnant Rat Dissection

This week the sophomore Biology students dissected pregnant rats.

The New High School Video Production and media class has been working hard to bring new types of media ideas and consumption to the high school students. This is their first installation, of many to come, of CAVALIER PRODUCTIONS. This "Production Company" is set to showcase sport highlights, student daily life, events, promotions, etc.
